

List of Claims

- 1 (currently amended)-

A device for carving into a carrot comprising a handle having a first end and a second end, said handle having at least one U-shaped blade extending from said first end, wherein said blade is disposed at a right angle relative to said handle and said blade has at least one sharp cutting edge operatively arranged to carve into said carrot; a head that is configured to perpendicularly extend outwardly from said handle and said blade has L-shaped ends which are molded into said head portion of the handle.

-2- (cancelled)

-3-(cancelled)

-4-(cancelled)

-5-(cancelled)

-6- (currently amended)

The device for carving into a carrot recited in Claim 5 1 having a ring affixed to said second end of said handle.

-7-(original)

The device for carving into a carrot recited in Claim 6 having at least one groove operatively arranged as a thumb grip proximate said first end of said handle.

-8-(original)

The device for carving into a carrot recited in Claim 7 wherein said handle includes a tapered center portion.

-9- (currently amended)

A device for carving into a carrot comprising.

a handle having a first end and a second end;

at least one blade extending from said first end of said handle disposed at a right angle to said handle, wherein said blade is U-shaped having at least one sharp cutting edge operatively arranged to carve into said carrot;

a ring affixed to said second end of said handle;

at least one groove operatively arranged as a thumb grip proximate said first end of said handle;

a head that is configured to perpendicularly extend outwardly from said handle and said blade has L-shaped ends which are molded into said head portion of the handle.

-10-(original)

The device for carving into a carrot recited in Claim 9 wherein said handle has a tapered center portion.

-11 -(original)

The device for carving into a carrot recited in Claim 10 wherein said handle has a head attachment and said blade is mounted to said head attachment.
